

Bapuji Institute of Engineering and Technology, Davangere is a center of learning where young talents after their 2nd PUC will get admission in different branches of Engineering. The major emphasis of the institute is to impart Outcome Based Education and Technical Training to encourage problem-solving skills among the students in their respective or interdisciplinary branches. Institute is putting efforts to make their students industry ready and be quick learner to adapt with the fast changing needs of the present industries and also be life-long learners to face the challenges that may arise in their personal or professional life.

Continuous efforts are being made in the direction where our students become world-class technocrats of tomorrow. The goal is to position the engineering graduates to be problem solvers, project leaders, communicators, and ethical citizens. It is sure that our students would be an asset to the institute through their technical and managerial capabilities.
