PROJECT DETAILS

Project 1: Title: Generic Medicine Finder (GMF)

Software	Android Studio
Application	Mobile application
Technologies	Windows 7/XP, Java, MySQL
Team Size	4
Duration	6 Months

Description:

Generic medicine finder (GMF) is a mobile application like Facebook, whatsapp etc., GMF is purely based on the medicines. Consumers have no access to information regarding generic (cheaper) drugs that are alternatives to the branded (more expensive proprietary) drugs. The aim is to promote access to such information through the use of android application and improve price transparency by creating a small database containing keywords that will easily provide consumers with detailed information about generic and branded drugs.

Project 2: Title: Polygon Animation

Software	OpenGL
Language tool	VC++
Technologies	Windows XP/2000/98, Microsoft visual studio.
Team Size	1
Duration	6 Months

Description:

The Microsoft visual studio is used as platform for this mini project. This mini project, demonstrates how the rotation of different objects occurs such as Computer graphics package system has been developed to overcome the problems faced in drawing graphical elements and to include some additional features.

Project 3: Title: Library Management System

Application	Web Application
Technologies	Windows 7/XP, Java, MySQL.
Team Size	4
Duration	6 Months

Description:

The project LIBRARY MANAGEMENT SYSTEM is for computerizing the working in a library. The software takes care of all the requirements of a library and is capable to provide easy and effective storage of information related to books and users. This software package allows storing the details of all the data related to library. The implementation of the system in the organization will considerably reduce data entry, time and also provide readily calculated reports.
